

## ATTENTION CLIMBERS!

HAVE YOU COMPLETED AN AUTO BELAY ORIENTATION? IF NOT, SEE THE FRONT DESK BEFORE CLIMBING ON AN AUTO BELAY.

- Check Auto Belay operation by pulling out a short section and allowing it to retract.
- If the Auto Belay line fails to retract during climbing stop climbing immediately and request assistance.
- Check the climbing harness is correctly fitted and tightened.
- Check the carabiner from the Auto Belay line is connected to the designated loop on the climbing harness and the gate is properly closed.
- The carabiner is opened by rotating the gate's collar and pushing the gate open towards the center of the carabiner.
- Attach the carabiner to the correct loop on the harness with the latch facing away from the user.
- Allow the latch to snap shut, ensuring the collar has rotated back and is locked. Ensure that no clothing, webbing or other objects are obstructing the gate or latch.
- Double check that the latch is secure.
- Ensure the carabiner latch gate is facing away from you, the climber.
- Never climb alongside or above the Auto Belay.
- Never start descent from above the Auto Belay.
- Prior to descent, ensure descent path and landing area are free of people and obstructions.
- Always descend feet first using feet to fend off obstacles and prepare for landing.

*Climbers, owners and operators are responsible for reading and understanding the information in the TRUBLUE Operator Manual prior to use.*
